

## WORLD WILD LIFE DAY

The Department of zoology conducted world wildlife Day on 03-03-2024 at zoology Lab.

In this occasion create awareness about importance of wild animals.

Some Inputs:

Every year, World Wildlife Day highlights a new theme that focuses on a particular facet of wildlife protection. The theme for the year 2024 is "Connecting People and Planet: Exploring Digital Innovation in Wildlife Conservation." The theme emphasizes the vital role that digital innovation plays in animal conservation. It emphasizes the need of using technology to improve our understanding of wildlife, monitor population trends, and develop novel solutions to safeguard endangered species and habitats.
